

Rhinoplasty and other Surgeries of the Nose

When it comes to the ideal appearance of the nose, balance is critical. Not only should the nose be symmetrical within itself, but it should also be in proper proportion with the rest of the face. Although it is located as a central focal point of the face, it should not attract attention. Your nose should allow attention to be drawn to the more attractive and desirable facial features, such as your eyes and lips. If your nose is a distraction from your natural beauty, plastic surgery of the nose can be an excellent solution.

Nose plastic surgery is used in a variety of situations, including after an injury or trauma, to treat rhinophyma (severe rosacea symptoms) or to correct an unattractive nose that you were born with. There are a variety of nose surgery procedures and techniques to accomplish a patient's specific goals. **At Kalos Facial Plastic Surgery, LLC, we offer the following nose procedures:**

- Rhinoplasty
- Nasal Fracture Treatment
- Non-Surgical Rhinoplasty
- Revision Rhinoplasty
- Rhinophyma Treatment

Dr. Stong is a highly regarded facial plastic surgeon who is a dual board certified and reputable leader in nasal plastic surgery. He performs the most distinguished rhinoplasty techniques as well as revision rhinoplasty and non-surgical nose jobs. **Whether he is reshaping the nose, reducing its size, or improving a bulbous tip, Dr. Stong implements advanced techniques to help you achieve your specific goals.**

Dr. Stong is exceptionally equipped with the talent and skill it takes to overcome the unique challenges of nasal plastic surgery. It takes a highly experienced surgeon to provide favorable results with consideration to the proportion of the nose with the other facial features, the importance of its breathing function, and the delicate work that must be done to achieve ideal form and function.

If you are unhappy with the appearance of your nose, contact us today to learn more about our nose surgery procedures. You may also choose to combine your nose surgery with another facial reconstructive procedure at Kalos Facial Plastic Surgery LLC.
